Hi! 🌟 I'm the **INN Sight AI** assistant. Ask me anything about the platform, reviews, or AI analysis!

How is sentiment detected?

Sentiment Detection with AI

=====

INN Sight AI uses a combination of natural language processing (NLP) and machine learning algorithms to detect sentiment in hotel reviews. Here's a high-level overview of the process:

Text Preprocessing

- * Reviews are cleaned and preprocessed to remove punctuation, special characters, and stop words.
- * Text is converted to lowercase to ensure the algorithm is case-insensitive.
