#	Guest	Review	Sentiment	Theme	Suggested Response
1	SHIVI	The experience was so good and lovely. I loved the stay.	😊 positive	Experience	Thank you SHIVI! We are delighted you had a wonderful experience. We look forward to welcoming you again.
2	Saurav	The rooms were dirty. The experience was really bad and disappointing.	😞 negative	Cleanliness	We apologize Saurav for the cleanliness issue. This is not our standard.
3	Mehak	I loved the food. It was so good and so delicious. Amazing food quality. I loved it	😊 positive	Food	Thank you Mehak! We are delighted you had a wonderful experience. We look forward to welcoming you again.

The image shows a screenshot of the Visual Studio Code (VS Code) interface. The top bar includes the menu bar (File, Edit, Selection, View, etc.) and the search bar. The left sidebar contains the Explorer, Search, and Run and Debug views. The main editor area is divided into several panes. The top pane shows the 'THUNDER CLIENT' with a 'New Request' button and a list of requests. The middle pane shows a REST client request for a PUT method to the URL 'https://stay-inn-sight-ai.onrender.com/api/reviews/6a4be93a90c60d1be...'. The request body is in JSON format, containing a 'reviewText' field with the value 'Updated - The stay was absolutely wonderful and peaceful.'. The bottom pane shows the response of the request, which is a 200 OK status with a JSON body containing a 'success' field set to true and a 'data' field containing an object with 'id', 'guestName', 'reviewText', 'sentiment', 'theme', 'response', 'experienceType', 'createdAt', 'updatedAt', and 'v' fields. The bottom status bar shows the current file is 'todos-list' and the terminal output is 'PS C:\Users\DELL\todos-list>'. The system tray at the bottom shows the date and time as 23:25 on 06-07-2026.
