What a terrible experience from start to finish. We booked a deluxe room with an ocean view but were given a standard room facing the parking lot. When we raised this at check-in, the receptionist was unhelpful and told us nothing could be done. The room itself was dusty and had not been properly cleaned — there was hair in the bathroom and the towels smelled musty. The WiFi was practically non-existent despite being advertised as high-speed. We ordered room service which took over 90 minutes to arrive and the food was cold and tasted

Quick Examples:

Example 1 (The room was spotless and the ...)

Example 2 (Disgusting bathrooms, rude sta...)

Example 3 (Average stay. Location was con...)

1	Priyanshi	This hotel completely exceeded all our expectations. We were celebrating our anniversary and the team went above and beyond to make it special — there were rose petals on the bed, a complimentary bottle of champagne, and a handwritten note from the manager. The spa facilities were world-class and the massage therapist was incredibly skilled. Every meal we had at the in-house restaurant was a culinary delight — the chef clearly takes great pride in the quality and presentation of each dish. The room was luxuriously appointed with premium toiletries, a rain shower, and a king-sized bed that was the most comfortable we have ever slept in. Every single member of staff we encountered was professional, attentive, and genuinely friendly. This is without doubt the best hotel stay of our lives and we cannot wait to return.	 positive	Food	Thank you Priyanshi! We are delighted you had a wonderful experience. We look forward to welcoming you again.	Edit Delete
2	Yasmin	What a terrible experience from start to finish. We booked a deluxe room with an ocean view but were given a standard room facing the parking lot. When we raised this at check-in, the receptionist was unhelpful and told us nothing could be done. The room itself was dusty and had not been properly cleaned — there was hair in the bathroom and the towels smelled musty. The WiFi was practically non-existent despite being advertised as high-speed. We ordered room service which took over 90 minutes to arrive and the food was cold and tasted terrible. The pool was closed for maintenance the entire duration of our stay with no prior notice given. To top it all off, we were charged for services we never used and had to spend 45 minutes arguing at checkout to get the bill corrected. This hotel is a complete waste of money and I regret every moment spent here.	 negative	Cleanliness	We apologize Yasmin for the cleanliness issue. This is not our standard.	Edit Delete
3	Raj	We stayed at the Trishul Eco-Homestay for three nights expecting a tranquil mountain retreat, but our experience was deeply disappointing. When we arrived, the receptionist was on a personal call and made us wait nearly 25 minutes to check in. Upon entering our room, we noticed a damp, musty smell, stained bedsheets, and a bathroom lock that was completely broken. We called room service for clean towels and hot water, but nobody responded until the next morning. Furthermore, the breakfast buffet served cold, stale parathas and burnt tea. For the premium price charged per night, the lack of hygiene, poor maintenance, and rude staff attitude are unacceptable.	 negative	Cleanliness	We apologize Raj for the cleanliness issue. This is not our standard.	Edit Delete

ABOUT INN SIGHT AI

Empowering Homestays & Hotels with AI Intelligence

INN Sight AI is an intelligent guest review classification system that automatically identifies guest satisfaction levels, detects recurring service issues, categorizes themes, and generates actionable, AI-powered management responses.

Our Mission

Hospitality managers receive hundreds of unstructured feedback comments weekly across various booking channels. INN Sight AI bridges the gap between raw guest comments and operational decision-making by serving as a real-time intelligence engine that converts reviews into instant metrics, operational recommendations, and empathetic guest replies.

Powered By Production-Grade AI Architecture

Multi-layer model fallbacks designed for zero downtime and ultra-low latency

Positive

Groq LLaMA 3.1

Ultra-fast LLaMA 3.1 inference engine for deep review reasoning, theme extraction, and professional response generation.

Positive

HuggingFace RoBERTa

RoBERTa transformer models fine-tuned on hospitality datasets for precision sentiment & emotion breakdown scores.

Neutral

MongoDB & Express

Secure REST API infrastructure backed by MongoDB Atlas for real-time review persistence and JWT-authenticated routes.

Core System Capabilities

Automated Sentiment Analysis

Classifies guest reviews into Positive, Neutral, or Negative sentiment categories instantly upon submission.

Theme & Category Detection

Identifies whether feedback relates to cleanliness, food, staff, location, value, or overall stay comfort.

Actionable Insights & Recommendations

Extracts recurring issues and generates operational business recommendations for homestay hosts.

Domain AI Chatbot Assistant

An interactive floating AI assistant available across the application to answer platform and review questions.

Try AI Review Analyser Now

INN Sight AI

An intelligent guest review classifier platform powered by dual AI models (Groq LLaMA 3.1 & HuggingFace). Helping homestays and hotels understand guest sentiment in real-time.
